

LEUPOLD MARK 4 ER/T M3 FRONT FOCAL RIFLESCOPE

Leupold's® line of Mark 4® Extended Range/Tactical (ER/T™) riflescopes now includes a 4.5-14X50mm M3 Front Focal model for tactical, competitive shooting, and hunting situations that require exceptional accuracy from a distance. This model features Leupold's Tactical Milling Reticle (TMR™) in the front focal plane. The TMR reticle employs a series of various sized and spaced hash marks for increased ranging precision and more accurate shot placement. The Mark 4 4.5-14X50mm ER/T M3 provides shooters with the versatility of a variable magnification optic and the ability to range at all magnification settings. The Mark 4 ER/T M3 also features positive, tactile 1-MOA click adjustments for elevation, and ½ MOA click adjustments for windage. A lockable fast-focus eyepiece enables long eye relief, to provide the shooter with nearly instant target acquisition and protection from heavy recoiling firearms. For more information, contact Leupold & Stevens, Inc., Dept. S.W.A.T., P.O. Box 688, Beaverton, OR 97075-0688, (503) 526-1400, www.leupold.com.

NEW PRODUCTS AND ACCESSORIES GEAR LOCKER

MOSSBERG 500/590 TACTICAL FLASHLIGHT MOUNT

A major key to survivability in many tactical or personal home defense scenarios is a clear view of the target in both daylight and low-level lighting. GG&G has developed a solid and dependable flashlight mount for the Mossberg 500/590 shotgun. The kit includes a unique mounting bracket that securely attaches to the factory forend tube using the factory forearm retaining nut. The kit includes a new factory Mossberg Police synthetic forearm precision cut to clear the 500/590 flashlight mounting bracket, an assembly tool, and a MIL-STD-1913 rail. The rail and flashlight are located in the three o'clock position, giving the strong right shooter a tactical advantage at night. The MIL-STD-1913 rail is CNC machined from 6061 T6 aircraft

grade billet aluminum alloy and Type III hard anodized matte black, and the bracket is precision machined from rugged

4140 chrome moly steel and manganese phosphated matte black, per milspec. For more information, contact GG&G, Dept. S.W.A.T., 3602 E. 42nd Stravenue, Tucson, AZ 85713, (800) 380-2540, www.gggaz.com.

ESS CROSSBOW 2X EYESHIELD

Eye Safety Systems, Inc. (ESS) has announced the introduction of its new ballistic eyeshield: the ESS Crossbow 2X™. The Crossbow 2X is a revolutionary new ballistic spectacle that redefines functional eye protection for military and public safety professionals. The Crossbow Series delivers an unparalleled list of functional benefits: advanced Clear-

US NIGHT VISION ATAC 360°

US Night Vision Corporation announces the launch of its new Mobile/Marine based Pan/Tilt Thermal Imaging Camera. Built for both law enforcement and commercial markets, the ATAC (Advanced Thermal Acquisition Camera) 360° offers visual clarity in any lighting condition. US Night Vision Corp. has chosen FLIR Systems Inc. and Golight Inc. as its core components providers based on strength in their respective industries. The ATAC 360° is a low cost, high resolution thermal imaging system that is controlled by the touch of a button. Utilizing a 320x240 resolution FLIR™ camera, the system can see man-sized targets from over 1,500 feet. The thermal core uses long-wave infrared sensor technology and can easily see through smoke, fog, rain and many other atmospheric conditions. Whether used for law enforcement, first responders, surveillance and security, commercial security, maritime or military, the ATAC 360° is the product of choice based on price and performance. For more information, contact US Night Vision Corporation, Dept. S.W.A.T., 3845 Atherton Road, Suite 9, Rocklin, CA 95765, (800) 500-4020, www.usnightvision.com.

Zone™ FlowCoat dual lens coatings, which eliminate fog inside and prevent scratches outside; the DedBolt™ Lens Lock system, which keeps lenses easy to swap yet secure under impact, and which achieves universal fit with maximum comfort and zero pressure points; and 2.4mm ballistic polycarbonate lenses, which feature ESSOPTICS™ for distortion-free optical precision throughout the entire field of view. The Crossbow 2X

includes two fully assembled eyeshields with Clear and Smoke Gray lenses. The Crossbow 3LS™, a three-lens configuration, includes a Hi-Def Yellow lens. For more information, contact Eye Safety Systems, Inc., Dept. S.W.A.T., P.O. Box 1017, Sun Valley, ID 83353, (877) 726-4072, www.esseyepro.com/crossbow.

PACKING IN PINK

Packing In Pink (PIP) products are designed by and for women—and only women. Safety, of course, is always priority number one, but unlike other manufacturers' products, sex appeal and comfort are a very close second (and third). PIP's comfortable, lightweight earmuffs have a lightly padded headband and will reduce noise level by 28 db. Their stylish, anti-impact glasses are lightweight but very durable and provide superb protection due to their wraparound design. The earmuffs have

WILSON COMBAT 6.8 SPC PROJECT

Wilson Combat has announced the availability of their custom AR-platform rifles chambered in 6.8 SPC caliber. The 6.8 SPC (6.8x43mm) was initially developed by MSG Steve Holland and Chris Murray, a United States Army Marksmanship Unit gunsmith, to offer superior downrange lethality over the 5.56mm NATO/.223 Remington in an AR-pattern service rifle with minimal loss of magazine capacity and negligible increase in recoil. When built to the level of quality and precision Wilson Combat has achieved, the 6.8 SPC is also capable of outstanding accuracy and reliability. In Wilson's match-grade, Spec II chambered 16-inch barrels, the 6.8 SPC is capable of pushing a .277-caliber, 85-gr. bullet to over 2,900 FPS. 110-gr. bullets easily achieve 2,500 fps with factory-loaded ammunition. The ballistic performance of the 6.8 SPC makes it perfect for home protection, SRT/SWAT teams, and hunting. For more information, contact Wilson Combat, Dept. S.W.A.T., 2234 CR 719, Berryville, AR 72616, (800) 955-4856, www.wilsoncombat.com.

a suggested retail price of \$34.99, and the glasses are a true bargain at only \$19.99. Because of their devotion to women, PIP will make a donation to breast cancer research with every purchase. For more information, contact Packing In Pink, Dept. S.W.A.T., 44 Upjohn Road, Toronto, Ontario, CANADA, (416) 561-1734, www.packinginpink.com or by email at info@packinginpink.com.

MPA BRINGS NEW INNOVATION TO MAC-10

MasterPiece Arms, the nation's only true MAC-10 manufacturer, has taken the simplicity of the firearm's function to a new level of versatility with the implementation of a side-cocking mechanism. Placing the cocking handle on the side of the gun removes any obstruction from the line of sight on top of the barrel. There is a scope mount on the vacant space atop the frame. With the ability to add your own optics, the MAC-10 becomes customized to your needs, to give you the best results and

the maximum accuracy available. MasterPiece Arms uses state-of-the-art CNC machining, turning, laser cutting and bending in its manufacturing process. With versatile uses such as protection, hunting, tactical or novelty interests, MPA products are one of a kind and backed by a lifetime warranty for original owners. Suggested retail price is \$499.95. For more information, contact MasterPiece Arms, Inc., Dept. S.W.A.T., P.O. Box 669, Braselton, GA 30517, (866) 803-0000, www.masterpiecearms.com.
